

Handling our patients with safety and care

The Patient Safety Reporting [PSR] system enables standardized patient safety event reporting for the Department of Defense Military Health System's direct care facilities and help to reduce the frequency and severity of medical safety events. PSR provides analytic tools to identify areas for patient safety and quality improvement initiatives.

PSR offers the following:

Product Features

- Web-based event submission form with anonymous reporting option
- Automated event management system
- Standard and ad-hoc reporting features

Benefits to the Military Health System

- Standard method for capturing and tracking patient safety events
- Systematic methodology to aggregate and analyze patient safety event data
- De-identified event-level data accessible at the Service Headquarters and DoD Patient Safety Center for tracking and trending events
