

## Special care for special needs

The Special Needs Program Management Information System [SNPMIS] provides access to a comprehensive program of therapy, medical support and social services for young Department of Defense Military Health System [MHS] beneficiaries with special needs.

### Product Features

- Captures and records referral, evaluation, eligibility and service plan data
- Tracks services provided during each child's evaluation

### Benefits to the Military Health System

- Supplies access to comprehensive therapy, medical support and social services
- Makes it convenient for Educational and Developmental Intervention Services to deliver care
- Certifies that the MHS meets the unique information requirements required by the Individuals with Disabilities Education Act
